

MODULE D2 HARD DISK PCB REPAIR TRAINING

- D2.1 SMD Basic electronics for hard disk components and PCB repair, tools demo
- D2.2 Common problem in hard disk due to printed circuit board fault
- D2.3 Introduction to HARD DISK PCB , block diagram section of hard disk,
- D2.4 Power & protection section, DC to DC converter, (Mosfet, other smd component working and power detail in hard disk)
- D2.5 Mcu section, Data section, preamp section head (chip working concept power main signals)
- D2.6 Buffer Ram, flash rom section (working concept types and main signals)
- D 2.7 VCM Motor controller & read channel chip working concept and main signals
- D 2.8 Live pcb tracing, different volt of pcb, fault finding of hard disk pcb
- Online offline
- D2.9 Identify hard disk pcb no for donor pcb (Samsung, Seagate, wd, Hitachi, lbm , Maxtor,)
- D2.10 Replacing component and IC`s of hard disk (demo, video)
(understand different hard disk pcb, circuit troubleshooting chart)

D2.1 SMD Basic electronics for hard disk components and PCB repair

- Basic electronics fast revision
- Working concept of electronics component resistor, capacitor, diode, transistor, fuse, tvs diode, MOSFET, etc.
- Multimeter basic concept, testing different components
- Measuring and Identify ok, Short, Open components
- Introduction to component of hard disk PCB , resistor, capacitor, diode, transistor, MOSFET chips
- Removing and Inserting Different components
- Working concept of chips,

D2. 2 Common problems in hard disk due to pcb fault

- Totally dead Hard Drive does not spin up
- When hard disk connects to computer, computer does not start or hangs
- Broken power connectors
- Broken data connectors
- Spindle/arm driver chip failure
- You can see a burned component on the hard drive circuit board.
- Connector of motor or head is damaged
- Printed circuit board failures including pre-amplification
- TVS diode blow up
- Protection fuse, 0ohms resistor open
- PCB Damaged due to liquid
- Fire Damage
- Ceramic capacitor short
- Mosfet short, or not giving output

- Data connector resistor open
- Electric shock
- Pcb circuit open / short

D2. 3 INTRODUCTION HARD DISK PRINTED CIRCUIT BOARD, BLOCK DIAGRAM , SECTION OF PCB

INTRODUCTION TO DIFFERENT SECTION OF HARD DISK

- Introduction & Block diagram of hard disk printed circuit board
 - Identify different chips on hard disk
 - Mcu, driver chip, flash ram chip , buffer chip
 - Identify different component on hard disk
 - Resistor, capacitor, tvs diode, transistor, fuse , inductor, rectifier
 - identify circuit types, no models
 - Block diagram of hard disk pcb
 - How pcb work
 - Identify hard disk pcb

HARD DISK SECTION

- Hard disk Power section normal molex, sata
- Hard disk Dc to dc converter power section
- Hard disk Data section connection sata pata
- Hard disk Firmware section
- Hard disk Ram/ Buffer section
- Hard disk Vcm controller section
- Hard disk Spindle motor controller
- Hard disk Mcu section
- Hard disk Pre amplifier section
- Hard disk Head contact section
- Hard disk Spindle motor section

D2.4 Power section & DC to DC converter, (Mosfet & other smd component working and power detail in hard disk)

- Types of hard disk power connector
- Power input (sata pata)
- Pata old Molex 4 pin (5v & 12v)
- Sata connection 15 pin (5v, 3.3v, 12v)
- Checking hard disk open short thru power connector
- Understanding Protection circuit
- Semi conductor mosfeter transistor Manufacture name (Toshiba, NEC Rohm , Texas Instruments , Alpha & Omega , Anachip Corp, Diodes Inc, Philips Fairchild, Sanyo, International Rectifier,

- Mosfet working function
- Testing of mosfet in hard disk pcb
- Linear output,
- swithching output
- work of inductor in hard disk
- PWM controller IC
- Power supply to different chips

D2.5 Mcu section, Data section, preamp section head (chip working concept power main signals)

- Data section of hard disk
- Sata connection 7 pin
- Signal detail of sata connection
- Pata connection of hard disk 40pin
- Signal detail of pata connection
- Connection detail of sata and pata connector
- Main control chip MCU manufacture (ardent, agere, pokar, seaglet, oscar, beagle, dsp, lucent, quantum, wdtsiemens, shxxx, tlxxxx)
