

# Envision Cleanroom Technologies

*Competent and qualified  
Solution for clean rooms*

# Clean room technology for highest demands

Turnkey solutions for the Molecular Biology Labs/pharmaceutical industry

Envision has been investing in clean room technology and is a force to reckon in this field. Day after day, the company has inched towards the goal of building design and build projects of varying size and complexity. Pharmaceutical companies and medical labs all over the country are our customers. Sterile or non-sterile products in the primary and secondary production phase for liquid, semi-liquid or solid forms: our specialists draw on their in-depth know-how of the different manufacturing processes. We design and build The integral way. You award us the overall project and we assume total responsibility from conceptual planning right through to commissioning, qualification and validation. Your advantage: Cost and time savings, less burden on your internal staff, minimisation of overlapping operations. In short: Professional management of your project is of great importance to us.

## Our responsibility

As overall project managers, we are responsible for:

- Project management
- Planning/Design
- Contracts
- Financing models
- Procurement and logistics
- Execution/Site management
- Qualification/Validation
- Maintenance and Service
- Training

For all these activities, Envision Biotech guarantees deadline adherence, cost control and quality assurance.

## Your project is our project

Each project makes specific demands on the process sequences, the process infrastructure and the building construction. We identify ourselves with your goals and develop tailor-made, optimised solutions for you:

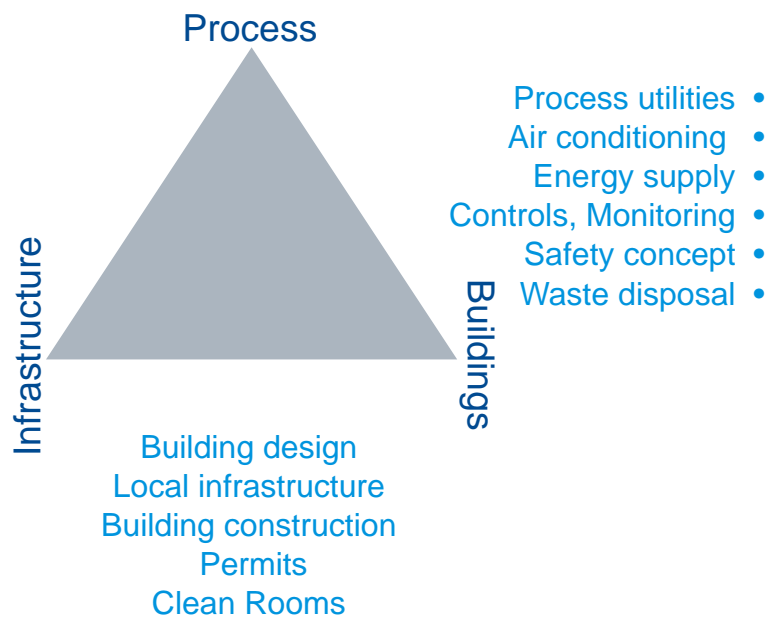

Data basis with objectives  
Concept and systems design  
Feasibility study  
Process optimisation  
Sequences, specifications  
Project design

## Our partners

Envision can call on a regional network of partner companies of many years' standing for:

- Pharmaceutical process engineering
- Logistics
- Process utilities
- Building construction

When choosing partner companies, we take our customers' wishes into account.

## Qualification and Validation

A professional execution of the individual qualification steps is part of our range of services. We document in detail the individual qualification steps and record all relevant data.

- VMP: Validation Master Plan
- SOPs: Standard Operating Procedures
- DQ: Design Qualification
- IQ: Installation Qualification
- OQ: Operational Qualification
- PQ: Performance Qualification
- PV: Process Validation
- RV: Re-Validation
