

Red PCB Board V7.020 KTAG K-tag ECU Programming Tool Master Version

V7.020 KTM100 KTAG ECU Programming Tool Master Software V2.23 with Unlimited Token

Available Protocols: BDM MOTOROLA MPC5xx

Easy to use, automatically recognize ECU model, high stability.

IF you need the full list of the model and ECU list that Ktag ECU Programmer Tool support.

Red PCB Board V7.020 KTAG K-tag ECU Programming Tool Master Version

What's New With Ktag Master Firmware V7.020 Software V2.23?

1. Many encrypted new car models works I.E for Toyota 76FXXX, for PSA 17.4.4, for Ford E83, for VW 17.5.5 (1766), for Mercedes-Benz 276ECU, for Toyota 76F, etc.
2. 100+ ECU types added
3. Software version: V2.23
4. Hardware version: V7.020
5. Multi-Language available: Italian Deutsch English French Portuguese Spanish
6. Support BDM Function Well, no checksum error, available Protocols BDM MOTOROLA MPC5xx
7. Support both Car, Motorcycle and Truck ECU Programming
8. Add New File type (FENDT/JCB/VALTRA TRACTOR BOSCH EDC17CV41 SISU ENGINE CAN

What's Main Difference between Our K-TAG KTAG 7.020 and Others?

1. Mainly Difference : Our K-TAG 7.020 add a GPT cable to support GPT Functions (GPT is new password ago cryptography that is implemented in new TRICOR microcontrollers. our KTAG V7.020 can easily read and decrypt the secret password and it automatically unlocks/unprotect the TRICOR sectors so it can read and write both Flash and EEPROM)
2. No reset button, no USB Dongle. NO Tokens Limited!!!
3. REAL VERSION OF KTAG 7020 EURO ALL ACTIVATED VERSION!!!

What is The Advantage of KTAG V7.020 Over Than Other ECU Chip Tuning Tools?

1. Supports online full protocols, fully activated, without tokens limited
2. There are lot ECU that need to disassemble from the car and open and this is the case for all the ECU that need to be programmed with Jtag, BDM and Boot protocols, so KTAG is needed, as the new generation ktagmaster, ktag 7.020 is the best choice.

3. K-TAG 7.020 can work For Toyota Hilux kun26 and new added 100+ ECU types & supports new car models e.g. for Toyota 76FXXX, for PSA 17.4.4, for Ford E83, for VW 17.5.5 (1766), for Mercedes-Benz 276 ECU, for Toyota 76F, etc.
4. KTAG V7.020 add a cable with GPT Functions.
5. Online operation supported.
6. Best PCB with Murata filters.
7. Multi-Languages Supported.
8. With a great performance and tested by many tuners and was regarded as one of the best ECU Programmer for trucks, heavy duty, boat.
9. No tokens limited, no years limited.
10. No USB Dongle, No reset button.

KTAG V7.020 Red PCB ECU Tuning Tool Install/User Note

1. The KTAG you received will with latest software 2.23 and hardware 7.020, so never update it online. We will send you free update link in future.
2. We don't sell SD card and chips alone.
3. We offer free Translate dim sport software for Ktag 6070, but no install help in this free gift.
4. Our KTAG 7.020 can be used online, no reset button need. No tokens limited

V7.020 Ktag ECU Programming Tool Master Version PCB

1. use of imported Japanese Murata NFE61PT472C1H9L filters
2. 2.8x WFs = Infineon, BCR112 NPN Digital Transistor
3. 3.7x 27E = ON Semiconductor NUP2105LT1G
4. 4.8x 6DW = NXP BC817215 NPN Bipolar Transistor
5. 5.3x A6c = MMUN2113LT1G / MMUN2113LT3G check your ktag PCB may already have 3 x A6c
6. 6.2x K5B = BC807-25-7-F PNP Bipolar Transistor
