SWING SYSTEM

Swing system is used in the design of wardrobes with a narrow door aperture, where the use of sliding system is impractical.

Obligatory condition when installing swing system - there is free space for doors opening.

SUSPENSION SYSTEM

Suspension system is intended for use as an interior sliding door or partition. The system can be fastened both to wall and ceiling.

This system is installed without bottom rail that allows us to solve the problem of clogging dust, and in time of breakage mechanism.

Suspension system also includes a decorative plate, performed in the profile style, which closes the suspension rail.
