

## RING TYPE TEMPERATURE SENSORS

### INTRODUCTION

NK Instruments Pvt. Ltd. manufacture Ring type Temperature Sensors, which are a perfect match in case when the temperature has to be measured for a smaller surface area / specific spot. It is also recommended when it has to be mounted on a moving object or, on any object which has vibrations.

### FEATURES

Ring type Temperature Sensor is like a Washer or, Spacer and had to be mounted on Stud or, Bolt and should be tightened using Nut. Even if there are vibrations in that equipment, the Ring shaped Sensor constantly remains in contact with the Stud / Bolt and performance without any interruptions.

Ring type Temperature Sensors are normally pT-100 RTD and are suitable for Temperature measuring range from -50 up to 250 degree C.

The common sizes of Ring type Sensors are 3/8", 1/2", 3/4" or, 1" ID and are available in SS 304 material.

Continuous efforts for product development may necessitate changes in these details without notice
