

Introduction:

Dust, fluff and grit particles are a major source of paint defects causing nibs, rough finishes and centers of weaknesses and corrosion. Long experience has shown that CLEAN-CLOTH is the only safe and economical method ensuring completely dust - free surface onto which paint can be applied. URJA SEALANTS PRIVATE LIMITED, manufacturer of CLEAN-CLOTH, is the foremost manufacturer in India and is supplying CLEAN-CLOTH to most Indian car manufacturers and to assembly plants throughout India. The impregnates that makes CLEAN-CLOTH tacky are manufactured solely for us for our own use. They are to our own formulae and are chemically compatible with all modern paint finishes, non - acidic, non-drying, non-staining, will not subject to spontaneous combustion and uniform in tack and quality. CLEAN-CLOTH is indispensable in vehicle paint shop. CLEAN-CLOTHS have many beneficial applications in most industrial production finishing processes. CLEAN-CLOTHS have many non - industrial applications too. Increasing number of decorators and model makers are using CLEAN-CLOTH to help to achieve the perfect finish they strive for. Press shops and mould shops are now using CLEAN-CLOTH to improve the finish on their jobs.

Application:

A surface ready for spraying, lettering and countless other jobs involving the application of paint, printing inks, lacquers, varnishes etc. simply by light wiping down the surface area involved all specks of dust and dirt are removed quickly and effectively trapped within the CLEAN-CLOTH. With one quick wipe, CLEAN-CLOTH ensures completely dust and fluff free surface. The soft tack absorbent impregnates ensures

maximum pick up and holding power. All dust and dirt particles likely to cause blemishes are firmly held and none can be transferred or shaken loose to become airborne and settle elsewhere. Care must be taken that surface to be wiped must be at ambient temperature and dry, free from solvent or water which may lead to transfer of varnish from the cloth to body.

Conclusion:

In developing the system, URJA SEALANTS PRIVATE LIMITED has 14 years of experience as manufacturing CLEAN-CLOTH for all types of Indian Industries that incorporate paint in their process. The CLEAN-CLOTH ranges of products are constructed from an open weave impregnated cotton fabric which combines high dust absorbency with strength and wear resistance. The ability to call on this expertise and knowledge has resulted in the development of the CLEAN-CLOTH, which has the following benefits:

1. One single quick wipe will collect invisible and visible dust.
2. Ensures completely dust and fluff free surface.
3. Surface being tacky collects all the dust particles on it and does not allow to transfer or to become air-borne to settle on the other surface.

Packing:

2 pieces per packet / 50 pieces per packet for standard CLEAN-CLOTH.

Note:

Standard Specification: SIZE: 25 x 130 Cms \pm 2 Cms, VARNISH CONTAIN 45% \pm 2%. Range of CLEAN-CLOTH can be supplied according to the customer's requirement. Taylor made

Size and Varnish % to suit individual application for which product code with specification will be issued on request, which needs to confirm by customer before release of order.

Warranty:

It should be appreciated that the information given here is to the best of our knowledge, true and accurate. However, since conditions under which our products are used are beyond our control, recommendations are made without warranty or guarantee.
