Prostration.

Real Heat Protector....

# AYUR-C COOL

Protects Birds from Heat Prostration

## Usage :

Ayur-C Cool prevents heat stress, make birds lively & more productive.

To meet higher physiological requirement of vitamin C during summer and other stressful conditions.

Improve FCR, egg production, egg shell quality in Layer and Increased weight gain in broilers.

To maintain fertility and hatchability in breeders.

For Improving bioavailability of essential minerals such as calcium and phosphorus, Iron etc.

To help greater oxygen consumption in summer conditions without much loss of fluid.

## Benefits :

As an antioxidant **AYUR-C Cool** prevents damage to proteins from the free radical hydrogen peroxide.

**AYUR-C Cool** is a cofactor in the hydroxylation of amino acids lysine and proline of collagen fibers. In chickens Vitamin C is especially important in the formation of collagen during wound repair.

**AYUR-C Cool** is useful to the young growing chickens during the periods of stress from environment or infections.

## Feed Inclusion Rate :

100 gm per ton of feed or as required or as directed by the Veterinarian.
