# SUBLIMATION

**Gurukrupa Speciality Films** is operating in the digital sublimation industry. Our product portfolio comprises coated sublimation papers for digital transfer. Dye sublimation is mainly used in industries like fashion, home textiles such as bed linen or curtains, advertising textiles such as exhibition banners, sportswear such as jersey.

We developed ourselves to become a leader in high-value quality paper for specific high-end applications. With a broad range of digital transfer papers, we have acquired good position in the market for industrial printing on textiles in a very short time. We are known in the industry as a reliable manufacturer and supplier of dye sublimation paper & sublimation transfer paper. We make use of the high grade raw paper procured from reliable sources. We sell our products in various industries like digital textile printing industry, fashion industry, sportswear industry, and home furnishing sector. We make use of high quality corrugated boxes for packing these products and ensuring safe delivery. We sell these dye sublimation papers at a reasonable price range in the markets.

### **Our Infrastructure**

Spread across an area of 12000sqft enabling us to complete our consignments timely. It is equipped with slitting machines and coating machines. We have a production capacity of over 2 lac mtrs plus per day. It is also inclusive of a customization facility, testing facility, R & D facility, and other facilities.

### **Distribution**

We are distributing our product range through nationwide dealer Network.

### **Our USP**

The main USP of our company is that it maintains the consistency and quality of its product line, and ensure that it is always up-to-the-mark.

Our sublimation papers are designed for maximum and consistent color transfer with a minimum ink consumption. Whether industrial or non-industrial printers – our dye sublimation papers are suitable for various machine types and speeds to cover a wide range of polyester based application segments.

GSF sublimation paper is just not capable of giving you premium quality results but also the results that is uncompromised from all aspects. GSF has set a new benchmark for its High Transfer Ratio and High Transfer Rate, with smooth surface which is best for all your applications.

### **DYE SUBLIMATION HEAT TRANSFER PAPER ROLL**

#### **Description of sublimation transfer paper**

Sublimation Transfer Paper for best results on all types of fabrics based on, like polyester, Nylon, Lycra and many more products like promotional products as key chain, mugs, caps etc. With ink release up to 95% or more.

- Fast dry and highest ink release.
- Work on all ink jet printers.
- Best color performance with excellence transfer rate.
- Extremely diverse range of size and length to select.
- Best color performance by over 92% transfer rate.

## Specifications

Type	: Dye Sublimation Paper
Color	: White
Use	: Textile
Application	: Sublimation Transfer Printing
Brand	: GSF
Material	: Paper
Features	: Anti-Rust, Moisture Proof
Surface	: Coated
Thickness	: 0.5 to 1 mm
Texture	: Soft

## Sublimation Transfer Paper Details :

- Paper Size : 8", 12", 24", 32", 36", 40", 44", 45", 46", 48", 50", 54" etc.
- Paper Length : 100 mtrs, 150 mtrs, 200 mtrs, 300 mtrs etc.
- GSM : 40 to 100 GSM

However, what is high tacky sublimation paper? The high quality full sticky paper has an adequate volume of stickiness on the whole paper surface which couples stable the fabric and sublimation paper while heat pressing process.

## Availability

Width mm (inch)	Legth of paper	Core size in meter	GSM available
914..4 mm (36 inch)	100	2"or 3	50 to 105 gsm
1016 mm (40 inch)	100	2"or 3	50 to 105 gsm
1118 mm (44 inch)	100	2"or 3	50 to 105 gsm
1143 mm (45 inch)	100	2"or 3	50 to 105 gsm
1219 mm (48 inch)	100	2"or 3	50 to 105 gsm
1372 mm (54 inch)	100	2"or 3	50 to 105 gsm
