JETEX BRG-575 HTS

High Speed Grease

Product Description of Synthetic high speed grease

JETEX BRG-575 HTS GREASE is a low-noise, high-speed grease for plain and rolling bearings. It consists of synthetic oil and lithium soap along with additives for protection from corrosion and oxidation. It is highly resistant to ageing and offer low internal friction. It reduces friction and wear; increases service life of the equipment and cuts down on lubrication costs by increasing relubrication intervals.

Features

- Extremely soft consistency
- Highly oxidation stable
- Water-resistant & prevents corrosion
- Low-noise and low-friction grease
- Good corrosion protection
- Resistant to oxidation and ageing
- Very good low temperature performance

Properties

Color	Light coloured, whitish	Visual
Penetration, unworked mm/10	265-295	ASTM D 217
NLGI Consistency	2	
Drop point, ° C	+180	ASTM D 556
Density, g/cc	0.85-0.95	
Service temperature range, ° C	-20 to +180	
Copper strip corrosion	1 a	ASTM D 130
Water resistance	1 a	DIN 51 807
Speed, DN factor	0-90	
	1 million
