GENETIC DISEASES / DISORDERS

NON-INVASIVE DIAGNOSIS & THERAPY FOR GENETIC DISORDERS.

An inherited medical condition caused by a DNA abnormality.

A genetic disorder is a disease that is caused by a change or mutation in an individual's DNA. There are three types of genetic disorders Single-gene disorders, Chromosomal disorders, and Multifactorial disorders.

A genetic disease is any disease that is caused by an abnormality in an individual's genome, the person's entire genetic makeup. The abnormality can range from minuscule to major, from a discrete mutation in a single base in the DNA of a single gene to a gross chromosome abnormality involving the addition or subtraction of an entire chromosome or set of chromosomes. Some genetic disorders are inherited from the parents, while other genetic diseases are caused by acquired changes or mutations in a preexisting gene or group of genes. Mutations can occur either randomly or due to some environmental exposure.

Predictive testing can identify mutations that increase a person's risk of developing disorders with a genetic basis, such as certain types of cancer.

Carrier testing can be used to help couples to learn if they carry, and thus risk passing to their children, a recessive allele for genetic diseases such as cystic fibrosis, sickle cell anemia, and Tay-Sachs disease.

Monogenetic disorders are caused by a mutation in a single gene. The mutation may be present on one or both chromosomes (one chromosome inherited from each parent). Examples of monogenic disorders are: sickle cell disease, cystic fibrosis, polycystic kidney disease, and Tay-Sachs disease.

Most common types:

Cystic fibrosis

An inherited life-threatening disorder that damages the lungs and digestive system.

Down syndrome

A genetic chromosome 21 disorder causing developmental and intellectual delays.

Duchenne muscular dystrophy

An inherited disorder of progressive muscular weakness, typically in boys.

Fragile X syndrome

A genetic condition causing intellectual disability.

Hemophilia

A disorder in which blood doesn't clot normally.

Huntington's disease

An inherited condition in which nerve cells in the brain break down over time.

Sickle cell anemia

A group of disorders that cause red blood cells to become misshapen and break down.

Thalassemia

A blood disorder involving lower-than-normal amounts of an oxygen-carrying protein.

Our work involves to DE-STRESS all concerned areas, causing an imbalance, leading to Diseases / Disorders. We work to MANAGE STRESS, to help the system function normally. Our work pattern is to DETOXYFY the system. Support it with ESSENTIAL SUPPLEMENTS & FREQUENCY ENERGIES. And finally, provide CORRECTIVE FREQUENCIES, to restore balance in the system. We strongly believe in "BODY HEALS ITSELF".

We very well know, at initial stages there are no symptoms. It can be diagnosed only when revealed on the physical. But by then it is too late.

We, at MEHAK WELLNESS CENTRE, under the expertise of DR RAJEEV PRAKASH MEHRA, a GOLD MEDALIST & REIKI GRAND MASTER offer NON-INVASIVE Diagnosis on State of the Art, latest 21st Century technology to verify the onset or presence of GENETIC DISEASES and Disorders due to the same.

We, run a GENETIC test along with testing for AUTO IMMUNE disorders and CHROMOSOMES, and are in a position to guide the client of a future onset or presence in specific areas for damage.

With vast experience of over 33 years, working with Cancer patients and being awarded with 80+ Certificates & Awards - DR. MEHRA is confident of handling all types of GENETIC Disorders. Type of Genetic disorder does not matter, we take care of them all.

The test thus helps us in taking preventive measures for the disease much before the damages are noticed, or much before it can be identified by modern science.

What we do / how we tackle this issue.

We conduct a test to reveal the Genetic Disorders. On having the results for the Genes, Chromosomes, Auto Immune & damage specific areas, we are in a position to assess the damage done or possible damage in the near future.

Our work is NON-INVASIVE. We work with BIOFEEDBACK and RADIONICS. All types of Genetic Disorders are scanned and worked upon. Almost all types of Genetic Diseases and Disorders can be worked upon and stabilized. We work to repair the issues and stop any damage to the DNA.

Being in NON-INVASIVE stream, we do not recommend any form of medication or Surgery. As far as possible we advise to avoid removal of any Body Part.

Basic cause for any disorder and discomfort is mainly due to GENETIC factors, thus by working on the root cause and stabilizing the GENES, CHROMOSOMES, AUTO-IMMUNE disorders and all parameters related with support to the Immune System, we are in a position to stabilize the condition without any side effects or danger to client's life. Repair on every parameter causing stress for Genetic disturbance is taken into account.

Genetic Disorder usually is hereditary, but a wrong lifestyle too could be responsible. To stabilize the condition we work on the Genetic factors, Chromosomes, Autoimmune Disorders and all such areas required to balance the condition. Corrective measures are taken for issues instigating / provoking / supporting GENETIC DISORDER.

We advise to COMPLEMENT our services, with the ongoing therapies / treatment for better and faster results.

We strongly recommend DETOX procedure. This should be started immediately. COLLOIDAL SILVER WATER, ANTIOXIDANT HYDROGEN RICH WATER, ATOMY VITAMIN C and use of ZAPPER. RADIONICS and RIFE FREQUENCIES for basic corrections; start immediately on the RADIONICS maintenance kit. DIETARY SUPPLEMENTS (HemoHIM) for speedy recovery. NON-INVASIVE therapy is administered, which could take 18 to 72 sittings depending on the individual's resistance from within and the body's ability to HEAL.
