

**PUSH / PULL
ACTION TOGGLE CLAMP-
FRONT BASE**

'P-TECH' Push/Pull Action Toggle Clamps have a straight line action as the plunger moves in straight line forward & backward with easy to operate handle. The plunger moves forward and locks as the handle is moved forward and plunger also locks in retracted position when handle is moved backward. Hence these clamps can be used as push as well as pull action clamps. Hardened & ground plunger moves in precision machined bore.

This model with front base is most popular because of its rigidity due to mounting base just under the load bearing surface of plunger movement.

Standard Accessories provided with Clamp : Standard Hex, Head Clamping Spindle assembly is provided as standard accessory.
