FEATURES/USES

'P-Tech' Precision Sine Vice is used to obtain precise angles by means of gauge blocks. Tool Maker's grinding vice is mounted with precision hinged hardened & ground rollers on hardened bottom plate made of tool steel. This Sine Vice can be used as a reference for inspection

- ◆Hardened & Tempered to 52 - 56 HRC.
- ◆Angle setting accuracy within ± 5 seconds.
- ◆All side Parallelism & Squareness within ± 0.005 mm.
- ◆Centre distance of rollers within ± 0.005 mm.
- ◆A recess of exactly 2mm depth is provided on rest plate for setting up of very small angles with standard gauge blocks.
- ◆Rust free hardened & ground hinge roller.
- ◆Inspection Certificate is furnished.

Chart for setting sine angles with the help of gauge blocks is provided.
