TRANSFORMER ADHESIVE

INSULATING ADHESIVE TA-4000: The product is a room temperature curing insulating adhesive. It is used in the manufacturing and repair of paper covered conductors. It is also used in the construction of oil filled Power & Distribution Transformers.

The 'Target' made **INSULATING ADHESIVE TA-4000** is most preferable product in the Transformer industry up to 1.6KV with quick curing time and best insulation.

Area of Application:

- For Copper-Aluminum coil winding with insulation paper.
- For sticking press board to make block/duct to avoid slip.
- For cotton tape wrapping on LV-HV coil covered with insulating paper.

Physical Properties

Appearance

Odour

Solubility

Drying/Curing Time

Viscosity

Clear Liquid

Nil

Completely soluble in water

4 to 8 hrs at room temperature

4000 Cps

ADVANTAGES:

- It is solvent free and safe.
- Room temperature curing.
- Fully cured bond is resistant to transformer oil & chlorinated diphenyl.
- Manufactured from eco-friendly chemicals.
- Packing Sizes Available: 35 kg, 50 kg
