कोलियस की व्यवसायिक स्तर पर खेती

## Introduction:

**T**he plant called the Coleus, Botanic name *Coleus forskohlii* is an aromatic perennial plant about two feet tall when fully mature. Coleus possesses tuber like roots and a straight and erect stem with colourful leaves. The coleus has an aromatic fragrance resembling the scent of the camphor plant.

## Uses:

**C**oleus eye drops can significantly decrease eye pressure in healthy people without eye disease. Coleus has not yet been tested in patients with glaucoma.

Some other uses:

- Irritable bowel syndrome (IBS).
- Urinary tract infections (UTIs) and bladder infections.
- High blood pressure.
- Good source for Cancer.

## Cultivation:

**T**he coleus plant is native to India and originally grew only there. These days, the coleus is used as an ornamental plant in many gardens and herbaria around the world. Coleus is also cultivated in other countries with a tropical or sub tropical climate. Coleus grows at an optimal rate in soils that have good drainage. Coleus can grow equally well in sites with direct exposure to sunlight as well as in partially shaded areas.

## Species:

**C**oleus is Medicinal herb; it's a bushy growing up to 2 feet. The active ingredient is Forskolin which is extracted by solvent extraction and exported to Japan, Germany, USA and Russia for drug formulation. This crop need irrigation and can be sown from July to March. Sandy loamy soil is good for this crop but it can be taken on other soil with little amendment and proper management.

## Marketing:

**T**his crop need irrigation and can be sown any time (except extreme climatic conditions). Generally its dry roots are marketed but its wet root also can be marketed easily. Our company also provides the facility of Buy Back agreement.

## Harvesting:

**A**fter planting, harvest can be done after 5-6 months. Make sure tubers should not be damage while harvesting. After harvest, the tubers are the cut into small pieces & allow drying under shade until it reaches 8% moisture level.

## Economics Of One Acre Coleus Cultivation:

### Expenditure:

Distance (in acre)	Cutting (in land)	Cost of Cut- ting (per cutting)	Total	Fertilizer	Cost of cultivation
			15,000X3 =	10,000 /-	45,000+10,000 =

6inchX2 ft	15,000	3 Rs	45,000 /-		55,000/-
<b>Total Expenses: 55,000/-</b>					

### **Income:**

Income of year	Dry Root (in 6 months)	Company buy-back (per kg)	Total
In 6 <sup>th</sup> month	1500 kg	100 Rs	1500X100= 1,50,000/-
<b>Total Income: 1,50,000/-</b>			

## Technical Support And Services:

**W**e also provide technical support for farming. Our Service Department with technically qualified staff provide after sales service and farmers' advisory services to our customers to get better plant establishment and faster growth of Herbal and Horticultural plantations.
