

SOIL APPLICATION

BHURAKSHA performs the role of an effective **SOIL CONDITIONER**. It is fortified with all Micro & Macro Nutrients (manufactured by us) which makes the product highly productive and cost effective.

	Cost with BHURAKSHA			Cost with Cow Dung			Cost with Vermi Compost		
	Kgs/ Acre	Rate/Kg	Cost / Acre	Kgs/ Acre	Rate / Kg	Cost per Acre (Rs)	Kgs/ Acre	Rate per Kg	Cost per Acre (Rs)
Material Cost	125	20/-	2,500	4,000	4	16,000/-	2,000	Rs.8/-	16,000/-
Transport cost			300						
Total Cost		2,800- 3,000				16,000/-			16,000/-

SPECIAL NOTES:

With BHURAKSHA, chemical fertilizer consumption can be drastically reduced. However, we recommend the following Chemical Fertilizers along with BHURAKSHA **INITIALLY for 2/3 CROPS** to make the organic material **TOTALLY ACCEPTABLE** to the soil.

ADD	LOCAL COMPOST (Vermin/animal dung/FYM)	UREA	DAP	POTASH	This combination gives excellent results by making the soil very much fertile
BHURAKSHA-500 GRAMS	100 Kgs	05 kgs	05 kgs	05 Kgs	

BHURAKSHA – TECHNICAL: Improvisation on BHURAKSHA to save transport costs.

BHURAKSHA TECHNICAL + LOCAL COMPOST Or LOCAL MANURE (Combination)			
BHURAKSHA TECH	Price for 500 grams	Cost of Local Manure (100 Kgs)	Total Cost per acre
500 gram	Rs.500-00	Rs.400/- (@Rs.4/- per Kg)	Rs.900-00
With the intervention of "BHURAKSHA TECHNICAL, input & transport cost on 100 Kgs per acre gets drastically reduced.			

PLANT PROTECTION (ORGANIC PESTICIDES)				
Product	Parameters	Dosage /Ltr of Water	Problems it addresses	
1 ATTACK (Microbial Derivative Sucking Pest Controller)- Excellent for Thrips, Mites, Flies & Mealy Bugs	Bio Extracts -60% Stabilizers, Inert Material – 20%	2.5 MI – 3.0 ml	Thrips, Mites, Whiteflies, Mealy Bugs	
2 ERA SAFE GUARD (Microbial Derivative Larva Controller)	Bio Extracts -60% Stabilizers – 20% Inert Material – 20%	2.5 MI – 3.0 ml	Spodoptera/Cutworm/Armyworm, Pectinophora (pink bollworm), Corn Earworm/Tomato, Brinjal, Chillies, Okra, Mango, Pomegranate fruit Borer etc, Borer/Pomegranate Fruit Borer. Diamond Back Moth (DBM) in Cabbage/ Cauliflower etc. Stem borer of Paddy, Maize/Sugarcane. Geometridae. Bean Pod Borer (Maruca) etc.	
3 FUNG KILL (Organic Fungus Controllers)	Bio Extracts -60% Stabilizers – 20% Inert Material – 20%	2.0 MI – 2.5 ml	Broad range of Fungal Problems including: <ul style="list-style-type: none"> Late blight on potato & tomato Panama wilt in banana Stem Rot In Ground Nut Fusarium wilt in Tommato, Tikka disease in Ground Nut Fruit rot in Chillies, Septoria leaf spot Purple blach on onions, Downy Mildew . 	
4 GUARD (Herbal Based Larva Controller)	Plant Extracts	3.0 ml	Thrips, Mites, MealyBugs, Whiteflies, Jassids, Aphid etc Larva Problems Fungal Problems	
5 NIVARAN (Herbal based Plant Vaccine to prevent Bacterial, Viral & Fungal Attacks)	Botanical Extracts., Filler Material	2.0 to 2.5 MI – 3.0 ml	Prevents Bacterial, Fungal and Viral Problems for the Plants	
	DISEASES ON WHICH NIVARAN WORKS WELL <ul style="list-style-type: none"> Early & Late Blights in All Crops except in Tomato in rainy seasons or highly moist climatic conditions, Powdery & downy mildew, Anthracnose Bacterial leaf spot Mosaic virus Leaf curl virus in Chilly, Tomato & Cotton. (However, the curled leaf does not straighten up. However, the coming up new leaves will be without curling)		PESTS ON WHICH NIVARAN WORKS WELL <ul style="list-style-type: none"> Aphids & Jassids Thrips Leaf miner Mites Spider mites 	
6 SHIELD (Viral Controller)	Ocimum Sanctum, Terpinoids, Poly Saccharides, etc – 90%	2.0 – 2.5 MI	Broad range of Viral Problems Vegetables & Fruits.- Chilli: Leaf curl virus,Okra: Yellow mosaic virus. Papaya: Papaya curl mosaic., Tobacco: Yellow mosaic virus. Tomato spotted wilt and yellow leaf curl virus. All Cucurbits mosaic virus: Cauliflower mosaic virus.
