Fabric : 55 GSM Non Woven polypropylene

Colour : Medical Blue, Royal Blue, Peacock Blue

Size : Universal , L – 117 cm, W – 160 cm

Design : Neck Ribbon, Hand Elastic

Packing : 120 Pcs / Cartoon

Disposable (single-use) isolation gowns are designed to be discarded after a single use and are typically constructed of nonwoven materials alone or in combination with materials that offer increased protection from liquid penetration, such as plastic films. They can be produced using a variety of nonwoven fiber-bonding technologies (thermal, chemical, or mechanical) to provide integrity and strength rather than the interlocking geometries associated with woven and knitted materials. The basic raw materials typically used for disposable isolation gowns are various forms of synthetic fibers (e.g. polypropylene, polyester, polyethylene). Fabrics can be engineered to achieve desired properties by using particular fiber types, bonding processes, and fabric finishes (chemical or physical treatments).
