

## GK-01 High Pressure Diffuser

### Summary

The GK - 01 high pressure gas diffuser is suitable for testing Compressed Air, Helium, Argon or Nitrogen in the pressure range of 30-150 psi. Airborne Particle Counters and Biological Air Samplers can be connected to this High Pressure Diffuser.

This product incorporates very high quality components, which ensures safety and reliability.

### Features and Specifications

- Flow Rate adjustable from 0-110 LPM
- Suitable for Compressed Air, Helium, Argon, Nitrogen and other non-corrosive gasses.
- Stainless Steel Casing and Components
- Inlet Pressure 30-150 PSI
- Stainless Steel Casing and Components
- Weight 5.0 Kgs only
- Dimensions: 180 x 180 x 260 mm
- Can be connected to any Particle Counter or Air Sampler having a flow rate between 0.1 to 100 LPM
- Very easy to use connections
- Flow regulator and Pressure Regulator in front so easy to operate
- Easy to clean
