

YWF-01 Pure Water Fog Generator

The Pure Water Fog Generator is a nebulizer that utilizes the principle of ultrasonics to produce large amounts of 1-10µm fog from the smoke pipe because of external pressure. It produces a thick fog that is very useful in Air flow pattern studies in Cleanrooms.

☞ Features:

- 1 hour of smoke generation.
- ADJUSTABLE FOG OUTPUT
- Can be connected to fog curtain wand
- Low Noise
- non-polluting (pure water fog)
- Air flow test in 1-10000 class rooms
- Light Weight

☞ Applications:

- Clean room laminar flow test
- Airflow balancing test
- Air Exhaust system test
- Duct leakage test

● Specifications

- Casing Material: SS304 Stainless Steel
- water Volume: 4.2 L
- Power Supply: AC36V (Step Down Power Supply included)
- Dimensions: 310×240×300 (mm)
- Weight of Instrument: 6.73 Kg only
