Type of Machine	Touchless gantry type
Washing Height	2150 mm
Machine Height	2600 mm
Machine Width	3350 mm
Machine Length	1200 mm
Electric Supply	415V, 3 phase 50 cycle with Neutral
Power required	6.98 kW
Time of wash cycle	1 min 50 sec.
Starting method	Push button/ automatic
Shampoo	Metering Pump 0.5 HP pump with automatic air injection arrangement
Water Pressure	5 bar
Water consumption	80-90 liters/wash cycle (depending on size of car)
½" Air line required	100-120 psi
Power consumption	0.08 - 0.09 units/car
Wash bay dimension (L x W x H)	6 m x 4 m x 3 m

**KWE LITE** is an **Automatic Touchless Washing** gantry type system designed for washing a car's body with high pressure water after covering the car with flakes of soap in less than 2 minutes.

The total structure of the car wash is made out of stainless Steel (SS 304/MS) to avoid corrosion. All operations of the machine are automatic & controlled by a PLC.

**Note:** The car wash can be combined with **KWE** under chassis wash system, **KWE** automatic dryer and **KWE** Water Treatment Plant as per requirement. Please see the overleaf for further details.
