HYBRID AMPLIFIER MODEL NO. 1609

Description :-

Optivision Model no.1609 is CATV amplifier used in cable transmission system and it can offer high quality video transmission service. The equipment adopts (SMT) surface mounting technology with elegant appearance and reliable performance. The main component of bi-directional amplifier high GaAs amplifier module. It is with Aluminium housing providing maximum heat dissipation specially designed to serve CATV network. This 1609 model have extrusion aluminium top cover looks very attractive.

Bandwidth Flatness $\pm 1dB$	ECO FRIENDLY	Attenuation -20dB	Hybrid Amplifier
Linear 1000MHz	Dual Power 220VAC / 60VAC	GaAs IC Module	HD + Digital Ready
