Expanding Digital Technologies

BATTERY DC HYBRID AMPLIFIER

7V-40VDC

MODEL NO. 909

Description :-

Optivision Model no.909 is DC BATTERY OPERATED CATV Hybrid Amplifier used in cable transmission system for distribution line and it can offer high quality video transmission service. The equipment adopts (SMT) surface mounting technology with elegant appearance and reliable performance. The main component of bi-directional amplifier high GaAs amplifier module. It is with Metal housing powder coated providing Economically and specially designed to serve CATV network. This unit operated only with DC power supply with range of 7VDC to 40VDC at very less power unit consumption. The Battery Back-up of this Hybrid Amplifier is 32Hr.

Bandwidth Flatness ±1dB

ECO FRIENDLY

Attenuation -20dB

Hybrid Amplifier

Linear 1000MHz

DC SUPPLY IN : 7V-40V

GaAs IC Module

HD + Digital Ready
