### **Pap-Tech A4 Sample Cutter Guillotine Type**

Paper Guillotine A 4 is used for A 4 cutting paper & Paperboard samples. The Paper Guillotine has a sheet metal base and incorporates a guide for the material to be cut. Both top and bottom cutting blades are made from special knife steel and can be resharpened.

It eliminates testing errors due to sample preparation. Cutting of multi samples simultaneously possible. The cutter is provided with an automatic clamping device, which by means of clamping beam, holds the sheet material firmly prior to the cutting action.
