DELMHORST PAPER MOISTURE TESTER

Model : PAP-2070

Moisture Meter is designed with electrical resistance by utilizing the relationship between moisture content and electrical resistance. The contact pins mounted on the top of the meter are used for making direct contact with the material. Moisture Meter is especially useful for testing paperboard, corrugated board, and paper tubes.

SALIENT FEATURES:

- Microcontroller-based circuit for greater accuracy and readability.
- Three scales for testing various paper stocks, cores and corrugated baled scarp paper and 0-100 arbitrary scale for obtaining relative moisture indications on other material.
- Set Point with buzzer to alert you when a pre-selected % MC has reached.
- Stores up to 100 readings and displays the average and highest of the stored readings. Built-in calibration check.
