PAP-TECH FLUFF TESTER

MODEL: PAP-2069

The tester enables fluff to be measured easily after simulating the action of printing press using a dry blanket. It is based on the concept of PIRA. The tester is capable of giving reproducible results and the fluff build-up proceeds at a steady rate with a number of sheets.

TECHNICAL-SPECIFICATION

Accuracy	0.1
Test Speed	0-1000 mm/min
Weight	150 kg
Type	Patra Type

APPLICATION STANDARDS

ISO5269/I, TAPPIT-275, SCANC-26

OPTIONALS
