

DydrofilTM

Dydrogesterone 10mg Tablets

It is an orally active progestogen which acts directly on the uterus, producing a complete secretory endometrium in an estrogen-primed uterus.

It treats female infertility, relieves various menstrual problems like heavy unusual menstrual bleeding or pain as well as irregular periods, Premenstrual syndrome (PMS) and endometriosis. It also restores normal menstrual cycles in case periods have stopped before reaching menopause.

Indications

Treatment of Female infertility

Treatment of Premenstrual syndrome (PMS)

Treatment of Pain during menstruation

Treatment of Endometriosis
