TELOMERE and CHROMOSOMES MANAGEMENT

NON-INVASIVE DIAGNOSIS AND TREATMENT FOR TELOMERE / CHROMOSOMES

A compound structure at the end of a chromosome.

Telomeres **may be one key to the aging process. Telomeres protect our DNA by acting as buffers at the ends of chromosomes. They have been compared to the plastic caps on shoelaces that keep the lace from fraying. Telomeres function as shoelace caps do, but they protect genes instead of shoelaces.**

Telomeres are an essential part of human cells that affect how our cells age. Telomeres are the caps at the end of each strand of DNA that protect our chromosomes, like the plastic tips at the end of shoelaces. Without the coating, shoelaces become frayed until they can no longer do their job, just as without telomeres, DNA strands become damaged and our cells can't do their job.

In any living organism, aging is the result of the decrease in the number and / or function of cells. Every time cells replicate, telomeres shorten until they reach a point where the cells can no longer divide properly. Cells with such short telomeres usually become senescent or enter apoptosis, and eventually die. Therefore, telomere length is a crucial biomarker providing insight into understanding organismal aging.

A telomere is a region of repetitive nucleotide sequences at each end of a chromosome, which protects the end of the chromosome from deterioration or from fusion with neighboring chromosomes. In humans, average telomere length declines from about 11 kilobases at birth to less than 4 kilobases in old age, with average rate of decline being greater in men than in women.

During chromosome replication, the enzymes that duplicate DNA cannot continue their duplication all the way to the end of a chromosome, so in each duplication the end of the chromosome is shortened. The telomeres are disposable buffers at the ends of chromosomes which are truncated during cell division; their presence protects the genes before them on the chromosome from being truncated instead.

Over time, due to each cell division, the telomere ends become shorter. They are replenished by an enzyme, telomerase reverse transcriptase.

ASSESSMENT IS CARRIED OUT FOR THE FOLLOWING 46 CHROMOSOMES:

Observational studies have found shortened telomeres in many CANCERS including Pancreatic, Bone, Prostate, Bladder, Lung, Kidney, and Head & Neck. In addition, people with many types of Cancers have been found to possess shorter leukocyte telomeres than healthy controls. However the increase in risk varies by age, sex, tumor type and differences in lifestyle factors.

Some of the same lifestyle factors which increase risk of developing CANCER have also been associated with shortened telomeres: including stress, smoking, physical inactivity and diet high in refined sugars. Diet and physical activity influence inflammation and oxidative stress. These factors are thought to influence telomere maintenance. Psychologic stress has also been linked to accelerated cell aging, as reflected by decreased telomerase activity and short telomeres. It has been suggested that a combination of lifestyle modifications, including healthy diet, exercise and stress reduction, have the potential to increase telomere length, reverse cellular aging, and reduce the risk for aging-related diseases.

TELOMERASE, the enzyme complex responsible for elongating telomeres through the addition of telomere repeats to the ends of chromosomes, is activated in approximately 80% of TUMORS.

We very well know, at initial stages there are no symptoms. Diagnosis for telomere is not available at all. Shorting of the Telomere can damage our DNA. So only when major disorders are reported, we would understand the value of healthy Telomers. At this point of time we would value the need for TELOMERE repair. But by then it is too late.

We, at MEHAK WELLNESS CENTRE, under the expertise of DR. RAJEEV MEHRA, a GOLD MEDALIST & REIKI GRAND MASTER offer NON-INVASIVE Diagnosis on State of the Art, latest 21st Century technology to verify the TELOMERE's presence in our system. We are in a position to diagnose and treat for TELOMERE.

Non Invasive diagnoses much before any modern science equipment / test could reveal.

MEHAK WELLNESS CENTER, is the only specialized Centre in INDIA / ASIA to offer NON-INVASIVE TELOMERE Diagnosis and Repair.

Our work is NON-INVASIVE. We work with BIOFEEDBACK & RADIONICS.

We, run a 7000 parameter test along with testing for AUTO IMMUNE disorders and are in a position to guide the client of a future onset or presence of any major diseases.

With vast experience of over 35 years, working mainly with Cancer patients and being awarded with 80+ Certificates & Awards, DR. MEHRA is confident of giving positive results in all cases. Supplements to stabilize Telomere can also be offered.

Test helps us in taking preventive and corrective measures to balance the Telomere.

Diagnosis is carried out to evaluate the quantity of active TELOMERES, and also its presence in anti-aging process. If required, it can be corrected with BIOFEEDBACK therapy.

Therapy involves giving corrective Frequency to enhance the growth of TELOMERES and its stability. As it supports for anti-aging and is one of the 12 Anti-Aging parameters, balancing the same helps in the support for ANTI-AGING. A strong TELOMERE helps in stabilizing the CHROMOSOMES and eventually delaying the onset of chronic diseases.

Our work mainly involves 4 stages- DETOXIFICATION; CHROMOSOME test, to identify hereditary issues, faulty programming; IMMUNITY test, to verify an AUTOIMMUNE angle and finally support with SUPPLEMENTS (AMINO ACIDS, HORMONES, MINERALS and VITAMINS).

REVERSAL OF ALL CONDITIONS, DISEASES, DISORDERS POSSIBLE.

We advise to COMPLEMENT our services, with the ongoing therapies / treatment for better and faster results.

We strongly recommend DETOX procedure, along with IMMUNITY and DIETARY SUPPLEMENTS. This should be started immediately. COLLOIDAL SILVER WATER, ANTIOXIDANT HYDROGEN RICH WATER, ATOMY HEMOHIM and VITAMIN C and use of ZAPPER. Not to forget WHEATGRASS JUICE. RADIONICS and RIFE FREQUENCIES for basic corrections. Start immediately on the RADIONICS maintenance kit. HERBAL NUTRITION STEMCELL booster for speedy recovery. NON-INVASIVE therapy is administered, which could take 18 to 72 sittings of BIOFEEDBACK therapy to resolve most issues depending on the individual's resistance from within and the body's ability to HEAL.
