## Preface

I have been requested to write the preface of this **Surgical Instrument Catalogue Vol-1** by my partners.

There are numerous books and catalogues available on Operating Instruments but from our experience we thought that a user friendly publication with illustration is necessary. Experience has shown us that buyers of surgical instruments get confused while going through catalogues available in the market. Having drawn experience from direct contacts with Surgeons, Physicians and Anesthetists as to their requirement individually as well as in seminars, it is our experience that they get confused from ordinary catalogues available in the market and they have requested us to produce a user friendly and illustrative instrument catalogue for them and this is the result thereof. Relevant information regarding specifications is given and we tried to keep ourselves upto date with international standards. This Catalogue provides profile of instruments on General Surgery, Intestinal, Proctology, Urology and Gynecology & Obstetrics. We have further intention to publish another catalogue which will include E.N.T, Neurosurgery, Cardiothoracic, Plastic Surgery, Anesthesia Equipment, Oxygen Therapy Instrument and other instruments with optical fibers and light sources.

I hope this catalogue will be of assistance to the medical profession as well as to dealers in this trade.

*Monoranjan Chatterjee*

# INDEX

## A

ITEM NAME	PAGE NO
Abdominal Retractor	18,19,20
Adson Dissecting Forcep	12
Allis Tissue Forceps	5
American Pattern Umbilical Scissor	42
Amniotomy Forcep Goodwin	40
Anal Retractor	26
Anderson Obstetric Forcep	41
Aneurysm Needle	8
Artery Forceps	1,2,3,4
Auvarad Vaginal Speculam	35

## B

ITEM NAME	PAGE NO
Babcock Tissue Forcep	6
Backhaus Towel Clip	7
Back Bile Duct Dilators	25
Bandage Cutting Scissor	16
Bard Parker Handle	10
Barnes Episiotomy Scissor	42
Belfour Retractor Self Retaining	19
Biopsy Forcep	39
Bladder Retractor Millan	32
Bonney Dissecting Forcep	13
Bonney Myomectomy Clamp	34
Bonney Uterine Polypus Forcep	38
Bozeman Uterine Dressing Forcep	38
Bozeman Needle Holder	8
Brodie Director Probe Ended	9

## C

ITEM NAME	PAGE NO
'C' Shape Retractor	17
Cannula	40
Capsule Forcep	32
Catheter Introducer	29
Catheter	29
Cheatle Sterilizing Forcep	11
Cheek Retractor	21
Cholecystectomy Forcep	24,25
Clamp	23,24,30,34
Clip Applying Forceps	8
Collingwood Steward Hernia Forcep	9
Crile Artery Forcep	2
Curette	37,39
Cusco Vaginal Speculam	36
Cutical Scissor	14
Czerny Retractor	18

# INDEX

## D

ITEM NAME	PAGE NO
D.N.C Set	43
Datigues Uterus Holding Forcep	34
Deaver's Retractor	18
Desjardine Gallstone Forcep	25
Dilators	25,28,37
Director	9
Dissector Thyroid	10
Dissecting Forcep	12,13,22
Doyen Intestinal Clamp	23
Doyen Mymo Screw	35
Doyen Polypus Forcep	38
Doyen's Retractor	20,35,36
Dressing Scissor	14
Duckbill Speculum	36

## E

ITEM NAME	PAGE NO
Endometrial Biopsy Curette	39
Episiotomy Scissor	16,42

## F

ITEM NAME	PAGE NO
Forceps -----	
Amniotomy	40
Artery	1,2,3,4
Biopsy	39
Capsule	32
Cholecystectomy	24,25
Clip Applying & Extracting	8
Dissecting	12,13,22,
Female Catheter	29
Fistula Director & Probe	9
Flushing Curette	37
Foreign Body Remover	9
Gallstone	25
Hernia	9
Hysterectomy	33,34
Kidney Stone	30,31
Obstetric	41
Ovum	41,42
Piles	27
Sponge Holding	11
Sterilizing	11
Tissue	5,6
Uterus Dressing	38
Uterus Holding	34

## **Cleaning & Maintenance of Surgical Instruments**

Chatterjee Surgical manufactures all the surgical instruments under the supervision of specially trained technical staffs and all the instruments go through intensive checking before final packaging. Still we emphasize mostly on cleaning and maintenance to increase the life and working capability of each single instrument. Chatterjee Surgical suggests some interconnected care and maintenance guidelines to all our buyers.

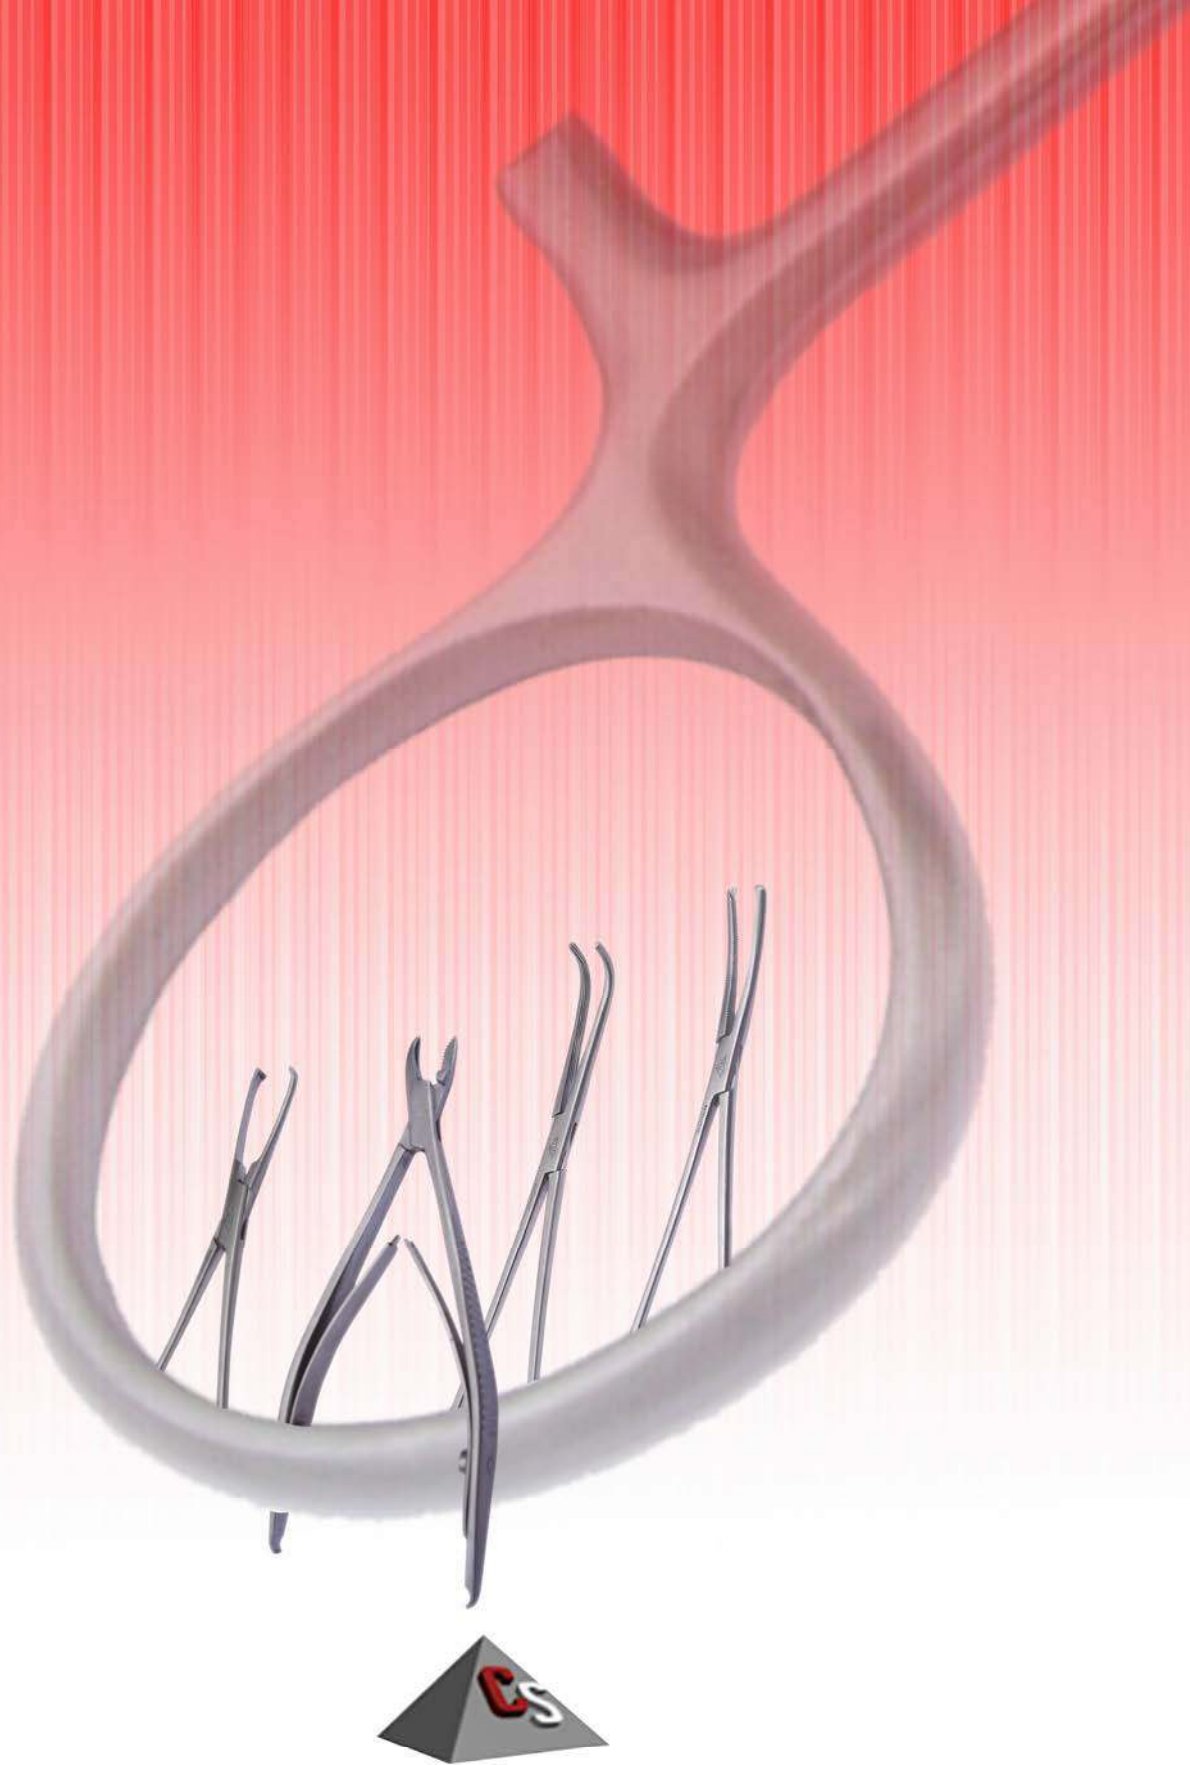

### **Manual Cleaning (Manual cleaning undergoes some careful stages)**

- ⊗ Rinse all the instruments immediately after operation under flowing water to remove all blood, fluids, tissues and other particles.
- ⊗ Submerge instruments into a suitable disinfectant with active cleaning properties so that all surfaces, inner cavities, lumens and openings come into contact with the solution.
- ⊗ The solution should preferably be a combination of distilled water and neutral PH (7) detergent.
- ⊗ Use stiff plastic brushes to clean the remaining and sticky blood stains particularly from hinges, joints, locks, boxes and other malleable parts and working points. Wire brushes may be used in a delicate way for grips, handles, within serrations and jaws (not causing serious damages in working points).
- ⊗ Examine carefully whether instruments are visibly clean and free from blood-stains and tissues.
- ⊗ Test and make sure the instruments are functioning properly.
- ⊗ After scrubbing rinse instruments thoroughly under running water. Final rinsing to be done with distilled or deionized water.
- ⊗ Dry instrument with an absorbent, soft and lint-free cloth.
- ⊗ Dry the instruments in air and store them in a clean and dry environment.

### **Autoclaving (Autoclaving is essential part before and after all surgeries)**

- ⊗ Lubricate all instruments properly.
- ⊗ Steam sterilize using a prevacuum cycle for 4 minutes at a minimum temperature of 132°C(270°F). *Note: Where there is a concern about contamination, the World Health Organization recommends processing through autoclave cycle for 18 minutes at 134°C(273°F).*
- ⊗ Do not overload the autoclave chamber.
- ⊗ Drying time will vary according to load size and should be increased for larger loads.

**Always use the proper sterilization /Cleaning technique to render the instrument in required condition for use.**
