SUBJECT: QUOTATION FOR CABLE WAY SYSTEM

Dear Sir,

We take pleasure introduce ourselves as registered manufacturers & supplier of all kinds of Meteorological, Hydrological Instruments as well as River Gauging Instruments

We Are supplying these items to all Government and Semi Government departments with their entire satisfaction We are also doing the repair works of these instruments at our workshop .Our all instruments covered a guarantee for one year from the date of supply.

We are enclosing herewith a catalogue for your kind perusal.

You are therefore requested kindly enlist our firm name on your mailing register & enquire us of our quality instruments,so that we may quote the most competitive prices.

Thanking You.

Yours Faithfully

For M/s Lakshmi Engineering Works

Proprietor

Introduction: The cable way installation is provided for determination of current velocities in water courses, canal and rivers. Depending on the kind of water and maximum possible current velocities suspended current meter equipment with snikers of 25,50 and 100kg and more can be used. By means of double drum winch, the meter body can be moved horizontally and vertically. The corresponding position of meter body can be determined with the help of the two counters. So a determination of current velocities from river bank is possible. Due to the solid execution of stationary cable way installation a safe operation is possible in extreme conditions (Flood , extensive span etc).
