

Paras Green – Energy Saver Kit for Almonard Fans

SAVE UPTO 30 TO 40% ON YOUR ELECTRICITY BILL PER YEAR

Energy Saving Motor Kit

Patent applied for

Energy Efficiency:

BLDC motors are more efficient. They consume less power and produce less heat, result is 30 to 40% saving in your electricity bill per year.

Environmental Protection:

Motors not only help in reducing energy consumption but also reduces the overall carbon footprint & helps in reducing emissions is a step towards a sustainable future.

Low Noise:

Produce less noise than AC motors, making them a better choice for quiet environments.

New Technology Compact Design:

Space-saving design, allowing them to operate at a high capacity at a smaller physical size with versatile & flexible design.

Speed Control:

Operated with Speed control, which means you can adjust the fan speed to suit your needs.

IOT Interface:

We can offer IOT Interface features.

Specifications:

S. no.	Size	Power (W)	Voltage (VAC)	Speed (rpm)	Weight	Current (A)	P/F	Air Delivery M3/min
1	18"/450 mm	64 w	230 VAC, 1 ph., 50 Hz	1330 rpm	0.6 kg	0.29 A	0.92	150
2	24"/600 mm	105 w		1308 rpm	1 kg	0.62 A	0.95	187
3	30"/750 mm	175 w		1150 rpm	1.27 kg	0.79A	0.96	170

Note -

1. Design, Specifications & Technical characteristics are subject to change without notice.
2. All above products are available in single phase only.
