

# mWRAPR

## Protein Stabilization Medium

### Product Description

mWRAPR Protein Stabilization media is a Stabilizing Medium for transport and storage of Proteins. It maintains integrity during sample transport/storage at ambient temperature, as an alternative to shipping cryopreserved samples.

mWRAPR is sterile and xeno-free, designed to protect proteins against shear stress, and to help maintain membrane integrity.

### Features

Zero infection risk during sample handling & transport

Easy sample processing

No dry-ice required, hassle-free shipping

Zero contamination shelf-life for up to 2 years

Sample Stability

No cold chain or dry ice needed!

Transport and Ship Samples at Ambient Temperature

TEMPERATURE

TIME

Ambient Temperature

Up to 48 hours

Samples are stabilized at the time of collection to analysis

## Ordering Info

Product Name	Cat. No.	Pack Size
mWRAPR Protein Stabilization Medium	MW-AZ0041-1	250mL
	MW-AZ0041-2	500mL
	MW-AZ0041-3	1000mL
