# Product Brochure: Cement Clinkers

## Product Overview

**Cement Clinker** is a key intermediate product in the manufacturing of Portland cement. Produced by sintering limestone and other raw materials at high temperatures, it forms nodules that are ground with gypsum to create cement. Indian clinker is globally recognized for its consistent quality and competitive pricing.

---

## Technical Specifications

Attribute	Details
Type	Portland Cement Clinker
Form	Solid nodules (3–25 mm diameter)
Color	Grey to dark grey
Composition	Alite, Belite, Aluminate, Ferrite
Moisture Content	≤ 1.5%
Free Lime	≤ 1.0%
MgO Content	≤ 5.0%
Loss on Ignition	≤ 3.0%
HS Code	25231000

---

## Export Details

- **Place of Origin:** India
  - **Port of Loading:** Tuticorin / Chennai / Mundra
  - **Incoterms Available:** FOB / CIF / EXW
  - **Packaging Options:** Bulk / Jumbo Bags (1 MT)
  - **Container Capacity:** ~25 MT per 20-ft container
  - **Delivery Time:** 30–45 days
  - **Minimum Order Quantity:** 1 container (25 MT)
- 

## Applications

- Raw material for cement grinding units
  - Used in OPC, PPC, and blended cement production
  - Infrastructure and construction projects
  - Export to cement plants worldwide
-

## □□Price Range (Indicative)

Quantity	Price per MT (INR)
25 MT (1 container)	₹4500–₹4,800
100 MT+	₹4200–₹4,500

*Prices vary based on destination, packaging, and shipping terms.*
