Sex Therapy

Our sex therapy equipment is an instrument which use a treatment strategy for sexual dysfunctions arising out of psychologic functions. When the problem is due to psychological or emotional cause like performance anxiety, fear of failure, guilt, poor self esteem, poor inter personal communications etc., the choice of treatment should be sex therapy. In the above cases what happens to the male partner is that he cannot get a proper erection. Now, it is up to the Psychiatrist / Clinical psychologist to show him that he too like any other person can have an erection when he approaches his partner. Many a times, just reassurances or doplar methods do not have the required effect. It is here that our sex Therapy equipment plays a major role.

Brain Polariser

Very effective in the treatment of depression both in mild and acute condition where ECT and drugs have failed. No side effects other than heaviness after treatment and skin irritation were noticed. The Brain Polariser is provided with pulsating low intensity current for polarization of the brain. It has been found to be very useful in certain cases where even ECT and Drugs have failed to produce results.

Electro Sleep

Electro Sleep is useful for inducing sleep in the patient of insomnia. The Electro Sleep has been developed and designed under the supervision of our experts. The apparatus relaxes the frontal muscles and eyebrows to develop heaviness causing patient to fall off to sleep.

Aversion Therapy

Aversion therapy useful to treat the addiction of Alcohol, chain smoking, Drugs etc. Addiction invariably leads to what is known as dependence or excessive reliance on alcoholism/chain smoking and is regarded as a behavioural disorder. The psychological changes brought about by the consumption of alcohol for along time may result in what is known as withdrawal symptom, in which the addicted person may become, so agitated and depressed may be to get another dose. Long-term or heavy consumption of additives invariably results in damage to brain cells. As a result many disorders might develop. Aversion Therapy used for de-addiction and remote control option available for treatment.
