

S2 BIOCIDE

DISINFECTION

LIQUID DISINFECTANT
WITHOUT ALDEHYDES

DISINFECTING ACTIVITY:

BACTERICIDAL
FUNGICIDAL
(*Candida Albicans*)

FIELD OF APPLICATION:

Disinfection and cleaning / degreasing / waterproof surfaces such as walls, floors and refrigeration and other facilities related to the production and trade of food, utensils and dishes in the plants of the food industry and sites of public purposes

USE INSTRUCTIONS

ACTIVITY	CONCENTRATION OF THE SOLUTION	TIME TO ACT
BACTERICIDAL	1%	5 min
FUNGICIDAL (<i>Candida Albicans</i>)	1%	15 min

Prepare a 1% aqueous working solution of the product

Disinfection is performed by wiping or soaking.

Surfaces must remain wet with the solution during the exposure time.

When soaking items they have to be covered by the solution.

Surfaces and equipment which are in contact with food must be rinsed with clean water.

Application rate: until surface is completely wet.

COMPOSITION:

Active substances: di-n-decyl
dymethylammonium chloride:
10 g / 100 g;

non-ionic surfactant: 5%–15%;
propan-2-ol; EDTA: <5%;
potassium hydroxide

PACKAGING:

Bottle 1 KG, Container 5 L, 12 KG

SHELF LIFE:

2 years from date of manufacture

IMPORTANT INFORMATION:

Using indicated concentration S2 BIOCIDE is safe for use on aluminum and other soft metals.
Do not mix the product with acidic products or such which contain anionic surfactant!

The product is for professional use. For further information and safety instructions see product label and safety data sheet. Do not mix with other products!

SAFETY INFORMATION:

**Before use observe the rules for safe use of the product**

- Provide adequate ventilation.
- Avoid contact with eyes and skin.
- Do not breathe preparation.
- Wear suitable gloves and mask where is possible.
- Keep out of the reach of children.
- Keep away from food, drinks and feed.
- Do not mix with other chemical mixes.

Transport:

To be transported in covered vehicles separated from food, beverages and chemicals.

Storage:

Store in original container, in a cool, dry, well ventilated area at room temperature, away from food and drinks. Keep out of the reach of children.

Personal protective equipment:

gloves, goggles, clothing.

Fire Protection:

CO₂, dry chemicals and water. Extinguish fire from maximum distance. Firefighters to wear breathing apparatus and protective clothing.

Description of first aid measures:

- If inhaled - If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.
- In case of eye contact - Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
- In case of skin contact - Rinse with lots of water. If irritation persists, seek medical advice.
- If swallowed - Do not induce vomiting. Rinse mouth with water. Consult a physician.

There is no specific antidote. Treatment is symptomatic.

In the event of an accident and / or spillage, take measures for its localization and limitation, and the amount collected from the product to be stored temporarily in special tightly closed and labeled containers and then be transferred to eligible company.

Measures should be taken to avoid contamination of surface and groundwater, soil and drainage system.

Type of generated gases and reaction products in the event of fire:

carbon monoxide, nitrogen oxides. To extinguish fire be used personal protective equipment - breathing apparatus, protective goggles / helmet, protective clothing.
