## Automatic Water Level Controller

**MICROPROCESSOR BASED INTELLIGENT SYSTEM**

**SAVER WATER FOR YOUR FUTURE**

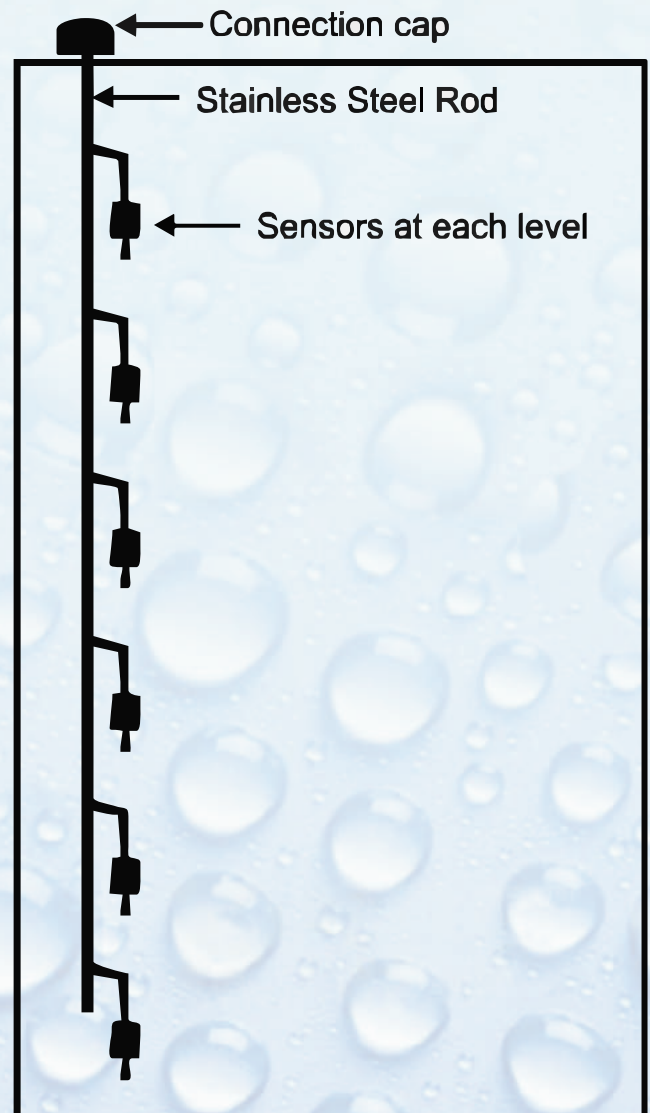

**so save each drop of water....**

**EASY INSTALLATION  
LOW MAINTENANCE  
FULLY AUTOMATIC  
SAVES WATER & ENERGY  
INCREASES PUMP SET LIFE  
COMPACT ELEGANT DESIGN  
AVOID OVERFLOWING TANKS**

### Features of Water Level Controller :

- \* Microprocessor based circuit for maintenance free operation.
- \* Seven Segment 2" LED Display to Display water level in tank.
- \* Stainless Steel 304 Grade Level Sensor pipe consist of magnetic float & Electronic switch for Long life.
- \* Control panel made of CRCA 16 Swg Sheet with chemical grade powder coating.
- \* Switches OFF the pump when the water level in OH tank reaches the maximum level.
- \* Visual display with Audio alarm on low water level in tank.
- \* Audio Alarm on Tank full with ON - OFF control
- \* Toggle switch for manual run of Pump when tank is full.
- \* No more overflow thus saving Water, Electricity, Time, Manpower.

## PRICE LIST OF WATER LEVEL DEVICE

Sl	Description	Unit	Rate
1	Microprocessor based circuit type water level device consist of seven segment 2" LED display fitted in the control panel made of CRCA 16 SWG sheet with chemical grade powder coating to display water level in tank, SS304 grade level sensor pipe fitted in the tank by clamping at the bottom and the top of the tank consist of magnetic float and electronic switch for long life, the pump automatically switch OFF when the water level in OH tank reaches the maximum level. Visual display with audio alarm on low water level in tank, Audio alarm on full tank with ON-OFF control, Toggle switch for manual run of pump when tank is full, heavy duty rubber coated wire (approx.100mtrs) for connecting the censor to the	Each set	55000.00
