

LM standard furnace

► General Information

The LM laboratory chamber furnace range of general purpose furnace is supplied in four sizes, each available with max operating temperature either 900°C or 1200°C.

► Standard Features

- ✓ 900°C or 1200°C maximum operating temperature.
- ✓ 1.5, 5, 7.9, 18.5 liter chamber volumes.
- ✓ Eurotherm make PID controller with single ramp to set point.
- ✓ Side way sliding door keeps heated surface away from the users.
- ✓ Energy efficient low thermal mass insulation
- ✓ Easy access to element & controls simplifies maintenance & servicing.
- ✓ Kanthal A1 heating element for optimum uniformity.

► Optional (specify these at time of order)

- ✓ Over temperature protection (recommended to protect valuable contents & for unattended operation)
- ✓ A range of sophisticated digital controllers, multi-segments programmers and data loggers is available. These can be filled with RS-232 or RS-485.
