

BECKHOFF AUTOMATION

With PC-based control technology, Beckhoff offers an open and universal automation solution for almost all industries. Besides Industrial PCs, I/Os and fieldbus components, as well as drive technology and the TwinCAT automation software, the range of products encompasses a uniform, scalable and modular control system. This control system provides suitable solutions for any task with regard to computing performance, complexity and costs.

The Applications & Solutions pages provide an overview of New Automation Technology in industry-specific applications.
