

Twin Shaft Crusher design

Technical specification of 5 hp Model Twin Shaft Crusher

Capacity, m ³ /h (Depends upon the Hardness of lumps)	2.5-10
Power supply, V/Hz	415/50
Power consumption, kW	3.75
Speed of rotor / Crusher RPM	140
Input Size of Lump mm	up to 250
Output Size of Lump / crushed material mm	2 – 6
Weight of machine kg	80
Overall dimensions (LxWxH) mm	850x750x350

Lump crusher is an ideal decision for lump products

Cement, Gypsum, Clay, Boric acid, French chalk, Pigments Lumps, and other lumpy products.
