FEP heat shrinkable tube

## Features

1. Excellent insulation
2. Operating temperature -200oC ~200 oC
3. Not burn in the air (Oxygen Index>95vol\%)
4. Excellent corrosion resistance
5. Low Friction: Dynamic friction coefficient 0.2-0.3

Application
Widely used in office machinery, paper machinery, printing machinery, printing presses, insulated jacket, etc.
the main insulation of rotor of the electric instrument
water treatment
make the magma sample in the field of oil field etc.
For UV lamp protecting (UV light can penetrate the tube fully,and the lamp can be protected so that the broken lamp won't hurt people )

For packing anti-corrosive things.
Speciality
Bear high and low temperature from $-200^{\circ} \mathrm{C}--200^{\circ} \mathrm{C}$
Non stickiness,against water and oil water touch angle $0-=114^{\circ}$
It won't burn in the air (oxygen index $>95 \mathrm{VOL} \%$ )
Anticorrosive
only Fluorin element,alkali metals can effect it in the high temperature,other all thick or thin abio or organic acid,or alkali or ester can't effect it .
Electric reliability,high insulation
Dielectric constant will always be 2.1 no matter when it is at the high or low temperature ( $60 \mathrm{~Hz}-$ 60 MNz ). Even if its surface is hurt because of fire, it won't have conductive rail
Volume resistivity >1018ohm
electric resistance>1013Ohm Surface resistivity >2x 1013 ohm
Bear electric arc $>165$ seconds, it won't creepage
Low friction
Moving Friction rate 0.2-0.3
