

GENERAL PURPOSE PROBES

*General Purpose probe Transition Joint. These multipurpose thermocouple & RTD are widely used in all types of industries for applications where bigger thermocouple & sensor are not accessible in all space, where mounting off bigger thermocouple & sensor is a problem, multipurpose thermocouple & sensor can be used depending upon the application. These multipurpose thermocouple & sensor are available in various sizes, types & measuring junctions.

Suitable for general purpose Applications up to 1200° c.

REQUIRED DETAILS

- A. Type of sensor.
- B. Operating temperature.
- C. Immersion outer Dia.
- D. Immersion length.
- E. Sheath Material.
- F. Terminal lug.
- G. Cable length & Insulation Type.
- H. Type of Junction.

PLASTECH SHEET NO: PTS-05
